Game Developer

Over **6 years of commercial experience** delivering high-quality games and immersive software across mobile, XR, and metaverse platforms. Specializes in **Unity and C#**, game architecture, performance optimization, and tools development. Proven track record in live operations, feature programming, and rapid prototyping for production-ready mobile titles. Collaborative and adaptable across cross-functional teams.

Key Skills

- Scripting Languages: C#, Lua, Python, C++, JavaScript, TypeScript, Java
 - Game Engines: Unity, Unreal Engine
 - Tools & Methodologies: Git, Jira, Cursor, Kiro, Agile
-

Professional Experience

Intermediate Game Developer

Oct 2023 – Present

Fluffy Dog Studio LTD

- Contributed to **3 shipped mobile titles** *Neopets: Tales of Dacardia*, *Neopets: Faerie Fragments* and *Neopets: Companion App* with over **100K+ downloads**, delivering **new game mechanics and logics** using **Unity/C#/Lua**
- Optimized **memory usage**, **reduced assets size by 70%**, significantly improving load times, and enhancing performance through efficient memory management
- Developed and shipped **3 WebGL mini games and features** for the Neopets: Classic Website, serving **100K+ active users**
- Created **5 internal tools** to streamline workflows and boost cross-team efficiency

Associate Frontend Engineer (Unity)

Oct 2021 – Jun 2023

Playstudios Asia Limited

- Enhanced and expanded **core game mechanics** in **Unity/C#** for *myVEGAS Slots* with over **10M+ downloads**, including implementing a level milestone system
- Supported **live operations**, contributing to frequent content drops and engagement features
- Built **7 internal tools** that accelerated slot game releases cadence (from **5 to 2 weeks**)
- Created **backend testing tools** and **automated data converters** to streamline collaboration across teams

XR Software Developer

Jun 2020 – Oct 2021

Eteam Entertainment Limited

- Led development of gameplay and interaction systems for **20 XR applications and games** (VR/AR/MR) using **Unreal Engine/C++/Blueprints and Unity/C#**
 - Developed **multiplayer systems** with Unreal's Online Subsystem, AWS or Photon, integrating **cloud services** (Azure Spatial Anchors, Vivox voice chat, Kinect/Cubemos body tracking) for seamless, synchronized player interactions
-

Freelance Experience

Freelance Software Developer

Nov 2019 – Present

Gabi Education Limited

- **Sole full-stack developer** of 10+ educational games and software, including 60+ mini-games used in classrooms by **1K+ students**
- Integrated **cloud services** and **AI tool** like **AWS, ChatGPT** and **Speech Recognition** to enrich gameplay interactivity
- Built custom **backend tools** for real-time data management and visualization
- Wrote **automation scripts (Python)** for performance and engagement analysis

Freelance Game Developer

Aug 2022 – Aug 2024

CanvasLand Metaverse Production Limited

- Led **full-stack development** of **8 client-facing metaverses** across Unity, Unreal, and Three.js
 - Integrated **multiplayer, voice chat, and avatar systems** using Photon, Agora, and Ready Player Me; implemented **Web3 wallet** features using thirdweb
-

Education

Bachelor of Engineering (Computer Science)

Sep 2016 – Jun 2020

The University of Hong Kong

UG Exchange Students in COMP

Sep 2018 – Jan 2019

Newcastle University

Speaking Engagements

Career in STEM: Programming Games, Programming a Future Career

Aug 2022

Girls Go Tech, The Women's Foundation Limited

- Invited speaker encouraging underprivileged girls to pursue STEM and game development careers
